PLAYGROUND PLUS!

The Playground Plus curriculum introduces fun and creative games, activities, and initiatives in a playground context. While the program focuses on playground specific activities, the lessons learned are valuable skills to a developing brain both on and off the playground. For our younger students, we center this course on sportsmanship and our activities, games, and initiatives spur growth in creative thinking, teamwork, and communication skills. For our older students we challenge them to set individual goals and prompt discussions on class lessons such as creativity, teamwork, and strategy. Most importantly, we love to have fun on the playground while watching each other grow!

- Separate Programs for Kindergarten, 1st – 3rd grade, and 4th -5th grade
 - We play traditional and non-traditional games
 - We are learning important skills as we are having fun!
- Find all of our After-school Enrichment options at our website!
