Fall Engineering Exploratory

GO GREEN

ENVIRONMENTAL ENGINEERING

Design, create, test, and refine basic solutions related to alternative energy and current environmental issues. Craft an efficient wind-powered machine and explore how it can help reduce the use of fossil fuels. Discover which materials most effectively clean up oil spills. Create littleBits® inventions that help save the environment and much more!

Bring your creations home!

Class is at Oak Hills on Wednesdays for Gr 4-5 starting Sept 6th!
