

WOODSHOP

Brookside:	Grades 1-3/ 4-5
Day of the week:	Thursday
Class Dates:	9/7, 9/14, 9/28, 10/5, 10/12, 10/19, 10/26, 11/9, 11/16 (No class: 9/21, 11/2)
Class Times:	grades (1-3) 2:35- 3:35pm grades (4-5) 3:00- 4:00pm
Meeting Room:	Outside lunch tables (Inside in inclement weather)
Class size:	Limited Space! (Remember to register early before classes fill up!)

Jet Plane

WE ARE CLEAR FOR TAKEOFF!

You be the pilot when you build this stealthy custom flyer. Plenty of cutting, sanding and gluing to make your plane aerodynamic. Soar with us when you add your own landing gear, after burners, thrusters or anything else you can think of! No boarding pass needed to store your belongings in the secret compartment in the fuselage.

“Turn your eyes to the sky..” and sign up for woodshop!

Science Technology Engineering Math

Everyone remembers Woodshop! Students use a variety of tools.

They learn- safety techniques- design- assembly- spatial perception- concentration- small motor skills- to follow directions- to think for themselves.

Participants feel a sense of accomplishment and pride as they build their project and watch it develop into something recognizable.

During the process they are both learning and having fun. We teach basic woodshop skills with a focus on safety.

The knowledge gained in this course will be useful to them throughout their lives.

-“My son loves to build and create. This was the ONLY class that offered this type of outlet.” (2016 Fall- Oak Hills Elementary Parent)

-“My child has benefitted from the class because he's developing a hobby, which I think is super important. It helps him practice figuring things out and solving problems independently. “ (2016 Fall- St. Jude Parent)

Why Woodshop?

Without a doubt this is a valuable program. This is not an instant gratification course. So much of modern life is just that, such as instant entertainment on the TV and computer, instant food with the microwave and fast food outlets. In reality - one needs to learn that both time and effort are needed to achieve something worthwhile and woodshop is a good start. We have found that with the effort required, the time it takes and the attention to quality, the children learn more and achieve far greater satisfaction. We go over safety, use of some tools, measurement and safety again. Discipline is maintained. The children learn to follow directions and are guided to think for themselves. It helps improve concentration. There is a pride and sense of accomplishment when making something with your own hands and watching it progress, as it is meticulously crafted. Kids are no different. Building something for themselves or as a gift for another is something they will gladly take time to do. Apart from all the learning during woodshop such as, helping with development of small motor skills, hand-eye coordination, design skills and math, woodshop is a whole lot of fun. Exercising both mind and body, participants will learn by doing and take away important skills that become life long tools. This program is of high educational and recreational value. Many parents and principals are appreciative of having this as an option and have thanked us for the effort we have made in bringing this to the community
