Jet Plane

WE ARE CLEAR FOR TAKEOFF!

You be the pilot when you build this stealthy custom flyer. Plenty of cutting, sanding and gluing to make your plane aerodynamic. Soar with us when you add your own landing gear, after burners, thrusters or anything else you can think of! No boarding pass needed to store your belongings in the secret compartment in the fuselage.

“Turn your eyes to the sky..” and sign up for woodshop!

Science Technology Engineering Math

Everyone remembers Woodshop! Students use a variety of tools.

They learn- safety techniques- design- assembly- spatial perception- concentration- small motor skills- to follow directions- to think for themselves.

Participants feel a sense of accomplishment and pride as they build their project and watch it develop into something recognizable.

During the process they are both learning and having fun. We teach basic woodshop skills with a focus on safety.

The knowledge gained in this course will be useful to them throughout their lives.

-“My son loves to build and create. This was the ONLY class that offered this type of outlet.” (2016 Fall- Oak Hills Elementary Parent)

-“My child has benefitted from the class because he's developing a hobby, which I think is super important. It helps him practice figuring things out and solving problems independently. “ (2016 Fall- St. Jude Parent)
