

# Advanced 2D Game Design

Thursday  
3:15pm-4:00pm  
3/25-5/20

Do you Dream of creating your own video game? This class will give young learners an opportunity to program their own video games using Scratch. No matter your student's skill level, we'll have great new projects that will allow everyone to push their skills forward. there is virtually unlimited number of game levels and designs possible! Students will learn the mechanics of how games are programmed and how coding can be used for crafting compelling games using the versatile Scratch application. Students will learn how to craft advanced graphics including custom character models, environments, and creative elements. This will provide insight into the creation of video games and allow students to let their creativity and ideas take the lead! This curriculum is perfect for Beginners and more experienced gamers and storytellers alike!
