

Building Number Sense with Mathnasium

What Is It?

Math games and problem solving activities so students can exercise "math muscles" and build number sense! All skill levels welcome!

When Is It?

Friday's

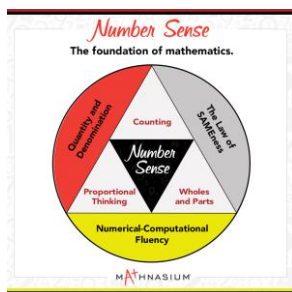

Kindergarten – 1:40pm-2:35pm – (7 Classes)

January 13, 20, 27; February 3, 10, 24; March 3 (No Class: February 17)

1st-5th Grade – 2:55pm-3:55pm – (7 Classes)

January 13, 20, 27; February 3, 10, 24; March 3 (No Class: February 17)

How Can I Register? www.growingoutdoors.com for dates, pricing, and to register online!

*The foundation of mathematics is **number sense** - the ability to appreciate the size and scale of numbers in the context of the question at hand.*

Mathnasium builds the deep understanding and lifelong love of mathematics that come from number sense.

Number sense isn't inborn: it's the result of interaction with specific concepts and skills, presented in a way that makes sense to the learner. It cannot be replaced by calculators or computers - it requires exercising "math muscles"!
